Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 13 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 13 and 14 fail to include an active process step which clearly defines the claimed process and thereby failing to set out and circumscribe a particular area. See *Ex parte Elrich* 3 USPQ2d 1011 (1984).

Claim Rejections - 35 USC § 102 and 103

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-23 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sugiura et al (6,054,401).

Art Unit: 1755

Sugiura et al teach a fireproof sheet glass composition including:

SiO₂ 56-68

Al₂O₃ .2-5

ZrO₂ 0-3

Na₂O .2-4

K₂O 6-14

CaO 6-12

SrO 0-12

Total R₂O 8-14

Total RO 21-26,

and has a thermal expansion of $75-95 \times 10^{-7} /K$. The warping point (strain point) is greater than 550°C. The glass product is produced from a float glass process not unlike that claimed, column 2, lines 45-65.

The claims are considered anticipated or in the alternative the subject matter as a whole would have been obvious to one having ordinary skill in the art at the time of the invention to have selected the overlapping portion of the range disclosed by the prior art because overlapping ranges have been held to be a prima facie case of obvious, see *In re Malagari*, 182 U.S.P.Q 549.

6. WO 98/4030320, equivalent to U.S. 6,905,991, is noted however the reference fails to teach or fairly suggest an amount of SrO of 5-12% as set forth in the instant claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl E. Group whose telephone number is 571-272-1368. The examiner can normally be reached on M-F (6:30-4:00) First Friday Off.
